

Company Overview

Principle Services is a veteran owned small business and the premier Owners Representative company for the power delivery and renewable energy industries. We help Owners develop and execute power infrastructure projects with Quality, Integrity, and Efficiency.

With expertise in transmission, substation, energy storage, and renewable generation, the team at Principle Services is your trusted partner for energy infrastructure project execution.

We have adopted a simple yet effective approach towards conducting business – serving our clients and treating our employees with respect, integrity, and professionalism that foster excellence in project execution. This approach requires a deep commitment to our Core Values. As our company continues to grow, adapt, and innovate, one thing remains the same:

We are building and empowering a great team that adds value to our clients.

Capabilities

- **Program & Project Management (PMO):** Principle provides integrated Program & Project Management to proactively execute tasks and make critical decisions on behalf of the Owner to drive projects towards successful adherence to scope, schedule, and budget.
 - Scope Management
 - Schedule Management
 - Budget Management
 - Risk Management
 - Contractor Management
 - Material Expediting
 - Project Reporting
- **Construction Inspection & Management:** Principle provides On-Site Construction Inspection and Management services to reinforce quality electric infrastructure installation, safe job performance, and well-managed scope, schedule, and budget.
 - Validating constructability and maintainability of infrastructure during planning and engineering.
 - Watching for long term maintenance concerns and cost prudence during design and construction.
 - Providing full-time onsite oversight validating quality and conformance with plans and specifications.
 - Submitting daily reports to accurately capture construction progress and quality.
 - Supporting a safe work environment by overseeing contractor enforcement of all safety rules and OSHA regulations.
 - Overseeing multiple Construction Inspectors, if applicable, and assist the Owner in coordinating scope and schedule among multiple contractors.
 - Providing on-site spot checks to identify quality deficiencies and associated corrective actions.
- **Environmental Compliance:** Principle Services Environmental, LLC, a wholly owned subsidiary of Principle Services, LLC provides qualified and experienced personnel to develop Stormwater Pollution Prevention Plans (SWPPP) and provide compliance inspections.

- o Develop site-specific SWPPP documents.
- o Prepare, file, and post the site-specific stormwater permitting based on requirements from the various regulatory agencies associated with the project location.
- o Principle utilizes electronic record keeping such that SWPPP documentation, permits, and inspection reports can be accessed electronically in near real-time.
- o In compliance with city, municipality, state, and/or federal requirements, Principle conducts SWPPP inspections throughout the duration of construction and until final stabilization is achieved.
- o Detailed reporting is provided following each inspection to identify corrective actions required to ensure the site Best Management Practices (BMPs) remain compliant.

Who We Serve

Principle Services was established with a purpose of providing energy infrastructure Owners with reliable project management solutions. In previous roles as owners of power delivery assets, our co-founders had experienced the challenges associated with managing the complexities of multiple vendors, validating comprehensive scopes to ensure quality installation, and receiving transparent information regarding evolving schedules and budgets. Our team is helping our clients overcome these challenges today.

TRANSMISSION & DISTRIBUTION

Serving a range of electric utility clients, including investor-owned utilities, municipally-owned utilities, and electric cooperatives.

ENERGY STORAGE

Serving developers, constructors, owners and operators of energy storage assets throughout the planning, design, construction, and operations lifecycle.

RENEWABLE GENERATION

Serving developers, constructors, owners and operators of renewable generation assets throughout the planning, design, and construction lifecycle.

Veteran Owned Small Business

Principle Services is proud to hold certifications associated with our position as a Service-Disabled Veteran Owned Business, described below.

The National Veteran-Owned Business Association (NaVOBA) enables corporate America to proactively source and confidently utilize businesses that are at least 51% owned, operated, and controlled by U.S. military veterans. NaVOBA's Certified Veteran's Business Enterprises™ (VBE) process is a

The U.S. Department of Veterans Affairs (VA) certification is non-industry specific and requires that firms meet the small business requirements established by the Small Business Administration (SBA). Certification requires that the company is at least 51% owned, operated, and controlled by a veteran.

nationally recognized gold standard in certification for veteran-owned businesses.
